EVENTS & MEETINGS (ORGANIZED & ATTENDED)

Mr. Khalid Taimur Akram hosted dinner for Mr. Ming, Bureau Chief Pakistan of Guangming Daily, China

1 February 2025

On 1st February 2025, Mr Khalid Taimur Akram hosted dinner for Mr Ming, Bureau Chief (Pakistan) of Guangming Daily (The largest circulating Chinese language newspaper in China). The dinner was also attended by Mr. Ming's father. Mr. Akram expressed his gratitude to the guests for their presence and their contributions to the discussions. He emphasized the importance of continued cooperation and understanding, with the hope that this dinner would be a stepping stone toward further collaboration in the future.

**Mr. Khalid Taimur Akram was invited by H.E. Dr Reza Amiri Moghaddam , Ambassador
of the Islamic Republic of Iran to Pakistan at Event on National Day of Iran**

2 February 2025

Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF), was honored to receive an invitation from His Excellency Dr. Reza Amiri Moghaddam, the Ambassador of the Islamic Republic of Iran to Pakistan. The invitation was extended to participate in a special event commemorating the 46th Anniversary of the Glorious Victory of the Islamic Revolution of Iran, as well as the National Day of Iran.

The event, which took place at a prestigious hotel in Islamabad, was well-attended by an array of distinguished guests, including diplomats, government officials, scholars, and members of the media, all coming together to celebrate the significant historical milestone for the Iranian people.

Researchers from Institute of Regional Studies (IRS) Visit PRCCSF

3 February 2025

On 3rd February 2025, Ms. Nabila Jaffer, a Research Analyst at the Institute of Regional Studies (IRS), along with a team of fellow researchers from IRS, visited the Pakistan Research Center for a Community with Shared Future (PRCCSF) and met with Mr. Khalid Taimur Akram, Executive Director, Pakistan Research Center for a Community with Shared Future (PRCCSF), Islamabad. The Institute of Regional Studies (IRS) is a reputable government think tank that specializes in analyzing regional dynamics, particularly those pertaining to South Asia and its interconnectedness with global powers. Ms. Nabila Jaffer and the team of fellow researchers from IRS diligently conduct comprehensive research on various topics, including the nuanced complexities of China-US relations, the multifaceted relationship between China and Pakistan, as well as China's governance structures and foreign policy initiatives.

During the meeting, Mr. Khalid Taimur Akram provided a comprehensive overview of PRCCSF's mission and objectives. The discussion highlighted the potential for synergies between the two institutions, leading to a significant decision to foster collaboration on various projects related to the Belt and Road Initiative. This collaboration aims to enhance understanding and strategic dialogue between China, Pakistan, and other global players involved in the BRI, thereby facilitating informed policymaking and fostering community engagement. Ms. Riffat B, CEO of The Legal & Management Consultants, Islamabad was also present in the meeting.

Mr. Khalid Taimur Akram Memorandum of Understanding (MOU) Ceremony held at IDI headquarters at Islamabad,

6 February 2025

A Memorandum of Understanding (MOU) was signed between IDI - INTERNATIONAL DISPUTE RESOLUTION INSTITUTE headed by Barrister Zopash Khan and Legal Management Consultants (LMC) headed by Riffat B.. The Ceremony held at IDI headquarters at Islamabad, Pakistan was attended by the Adil Aziz Qazi ,who is the Patron of this important initiative and Mr. Khalid Taimur Akram , who is the Adviser for Eurasian Connectivity for this joint venture.

This MoU will reflects the Shared Commitment for promoting Dispute Resolution Mechanism among Regional Countries under the framework of China- Pakistan Economic Corridor, Capacity Building, Knowledge Exchange and Enhancing the Investor confidence in Pakistan's Legal sector.

Ambassador Javlon Vakhabov and His Delegation Visit Pakistan

9 February 2025

On 9th February 2025, His Excellency Ambassador Javlon Vakhabov, Managing Director, The International Institute for Central Asia, Tashkent, Uzbekistan along with his delegation visited Pakistan and met with Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF) in Islamabad. Mr. Khalid Taimur Akram warmly welcomed His Excellency Ambassador Javlon Vakhabov and his delegation, which included Mr. Kadambay Sultanov, Chief Research Fellow, and Mr. Alouddin Komilov, Lead Research Fellow from the International Institute for Central Asia. The event was attended by the diplomats from the Embassy of the Republic of Uzbekistan at Islamabad including Mr. Ravshan Jumanov, Mr. Oybek Kambarov and Colonel LutafUllah.

During the meeting, H.E. Ambassador Javlon Vakhabov expressed appreciation for Mr. Khalid Taimur Akram's efforts in strengthening relations between Uzbekistan and Pakistan and boosting regional connectivity between Central Asia and South Asia.

The discussion highlighted the importance of bilateral cooperation in academic, research, cultural, and trade sectors, recognizing these collaborations as key components in fortifying the relationship between the Republic of Uzbekistan and Pakistan.

Furthermore, the Ambassador acknowledged and commended Mr. Khalid Taimur Akram for his significant contributions to enhancing academic research linkages and fostering people-to-people contacts between Uzbekistan and Pakistan. Mr. Khalid Taimur Akram also hosted a lunch for the delegation at his residence in Islamabad.

The meeting was also attended by notable figures, including Ms. Riffat Inam Butt, CEO of The Legal & Management Consultants, Islamabad, Prof. Dr. Amna Mahmood, Vice President of the International Islamic University in Islamabad, Prof. Dr. Zafar Nawaz Jaspal, Dean of Social Sciences at Quaid-i-Azam University, Islamabad, Mr. Arslan Javed, Director, Graana Group, Islamabad and Mr. Muzammil, Regional Head, Bank Makramah Limited (BML), Islamabad. At this occasion, Memorandum of Understanding (MoU) was also signed between The International Institute for Central Asia, Tashkent, Uzbekistan and PRCCSF, Islamabad. Both institutes agreed to work together for enhancing Regional Connectivity through Central-South Asia Corridor

Mr. Khalid Taimur Akram participated as a Keynote Speaker in the Two-Day 9th International Conference on “Sustainable Development Goals for a Better Future” held on 19–20 February 2025 at Islamabad

19-20 February 2025

On 19th and 20th February 2025, Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF), participated as a keynote speaker in the two-day 9th international conference titled “Sustainable Development Goals for a Better Future” organized by Women University Mardan in collaboration with Shaheed Benazir Bhutto Women University Peshawar, COMSTECH Islamabad, and the University of Lakki Marwat, Lakki Marwat held at COMSTECH Islamabad. The Chief Guest for the conference was Senator Sherry Rehman, Chair of the Senate's Standing Committee on Climate Change and Environmental Coordination, Islamabad. His Excellency Alisher Tukhtaev, Ambassador of the Republic of Uzbekistan to Pakistan, Ms. Farah Hamid and Mr. Wang Councillor Embassy of the People's Republic of China were the guest of honors.

All guests were warmly welcomed by the vice chancellors of Women University Mardan, Shaheed Benazir Bhutto Women University Peshawar, and the University of Lakki Marwat. Mr. Khalid Taimur Akram delivered a speech in Technical Session-3, titled “SDG-17 (Partnerships for the Goals).” The session was chaired by Dr. Davut Sahbaz, Associate Professor, Department of Urdu, University of Ankara, Turkiye, with Dr. Zarmina Baloch,

Department of Political Science, Shaheed Benazir Bhutto Women University (SBBWU) Peshawar, serving as Co-Chair. In his presentation, Mr. Akram discussed the China-Pakistan Economic Corridor (CPEC) as a catalyst for sustainable development, highlighting its role within the Belt and Road Initiative (BRI). His speech covered various topics, including energy and infrastructure development, equity and empowerment, environmental challenges, and regional connectivity. He emphasized the importance of CPEC in enhancing livelihoods, promoting innovation, and fostering people-to-people connectivity and cultural exchange.

The session was moderated by Ms. Wajeeha, Lecturer at Shaheed Benazir Bhutto Women University Peshawar. The conference featured a diverse lineup of international and national speakers.

International speakers included:

- Ms. Madiha Sajid, Chairman UPSIGN, UK Pakistan Global Network, Imperial College London, UK
- Prof. Dr. Ioannis A. Giannitsis, Department of Animal Science, Faculty of Agriculture, Forestry and Natural Environment, Aristotle University of Thessaloniki, Greece
- Prof. Dr. Davut Sahbaz, Department of Linguistics and Philosophy, Ankara University, Türkiye
- Dr. Zoltan Kelemen, Institute of Global Studies, Corvinus University of Budapest Hungary
- Dr. Saeed Ur Rehman, School of Agriculture and Biology, Shanghai Jiao Tong University, Shanghai, China

National speakers included:

- Prof. Dr. Shahid Baig, Head Life Sciences Department, Health Services Academy, Islamabad
 - Mr. Khurshid Ahmed Nadeem, Chairman, National Rahmatul-lil-Alameen Wa Khatamun Nabiyyin Authority (NRKNA), Islamabad
 - Prof. Dr. Anisa Qamar, Head Department of Physics, University of Peshawar, Peshawar
- Overall, the conference served as a vital platform for discussing sustainable development goals and fostering collaboration among diverse stakeholders committed to creating a better future.

**Mr. Khalid Taimur Akram was invited by His Excellency Albert P Khorev, Ambassador
Extraordinary and Plenipotentiary of the Russian Federation to Pakistan for the
celebrations of "Defender of Fatherland Day" held at Islamabad**

20 February 2025

On February 20, 2025, Mr. Khalid Taimur Akram had the distinguished honor of being invited by His Excellency Albert P. Khorev, the Ambassador Extraordinary and Plenipotentiary of the Russian Federation to Pakistan, to participate in the celebrations for "Defender of Fatherland Day." This important event, which commemorates the contributions and sacrifices of military personnel in Russia, was held in the vibrant city of Islamabad, marking another significant moment in the ongoing diplomatic relations between Russia and Pakistan.

Mr. Khalid Taimur Akram had a meeting with the Huawei team based at Islamabad,

24 February 2025

On 24th February 2025, Mr. Khalid Taimur Akram engaged in a productive meeting with the Huawei team situated in Islamabad, Pakistan. This meeting represented a significant step in fostering collaboration between key stakeholders in the technology sector and underscored the ongoing commitment of Huawei to invest in various sectors across Pakistan. As a leading global technology company, Huawei has played a pivotal role in many developmental initiatives in the region, notably its contributions to Safe City Projects in different cities.

VISIT TO PEOPLES'S REPUBLIC OF CHINA
(FROM 9TH TO 14TH FEBRUARY 2025)

Mr. Khalid Taimur Akram Visits Institute for Community with Shared Future (ICSF) in
Beijing, China

11 February 2025

On 11th February 2025, Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF) visited Institute for Community with Shared Future (ICSF) in Beijing, China and met with Prof. Li Huailiang, Dean of the Institute for a Community with Shared Future (ICSF), Communication University of China (CUC), Beijing, China.

The meeting was notably attended by the management of the Institute for a Community with Shared Future (ICSF), Prof. Zhang Yanqiu, Deputy Dean of ICSF, CUC, Beijing, China and Director of Africa Communication Research Centre, Ms. Sun Yuhong, Section Chief of the Confucius Institute Management Office of the ICSF, CUC, Beijing, China and Dr. Ge Yanling, Section Chief of the Office of the ICSF, CUC, Beijing, China. During the meeting, Prof. Li

Huailiang expressed heartfelt appreciation for Mr. Akram's significant contributions to championing the concept of a community with a shared future, as envisioned by President Xi Jinping. He acknowledged Mr. Akram's remarkable efforts, which have greatly

influenced the global academic community in support of the Belt and Road Initiative (BRI). Prof.

Li also commended PRCCSF's pivotal role in promoting regional connectivity and fostering win-win cooperation, recognizing their efforts in enhancing economic integration and cultural exchange, contributing to the progress and prosperity of the region. Mr. Akram discussed the working

plan for year 2025, focusing on research cooperation and event collaboration. They explored ways to deepen academic ties between their institutions, emphasizing collaborative research initiatives that align with the vision of a community with a shared future. The discussion highlighted various opportunities for joint seminars, workshops, and conferences aimed at promoting cross-cultural understanding and sharing best practices among scholars from diverse backgrounds.

At the conclusion of the meeting, Prof. Li Huailiang and the management of the Institute for Community with Shared Future (ICSF) hosted a lunch for Mr. Khalid Taimur Akram in Beijing, China.

President of Pakistan H.E Asif Ali Zardari's State Visit to China:

Mr. Khalid's Analysis on PTV World

6 February 2025

On 6 February 2025, in an engaging segment on the "VIEWS ON NEWS" program aired on PTV World, Mr. Khalid Taimur Akram provided an insightful analysis of the President of Pakistan H.E. Asif Ali Zardari's State Visit to China focusing on strengthening bilateral ties and strategic cooperation. The visit featured high-level discussions and the signing of key agreements across various sectors, including trade, economic corridors, and technology, which underscore the deep-rooted ties between the two nations. Mr. Akram emphasized Zardari's efforts to cultivate a strong personal rapport with President Xi Jinping, as well as the formal recognition of the evolving geopolitical landscape necessitating a robust and cooperative bilateral relationship. This visit also marked a reaffirmation of China's support for Pakistan, particularly regarding the sensitive issue of Kashmir, signaling a commitment to regional stability.

How China's Private Sector Fuels Economic Power: Insights from Mr. Khalid on FM 98

Dosti Channel

19 February 2025

On 19 February 2025, Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF), was invited as a guest on FM 98 Dosti Channel in Islamabad for a live interview on the program 'HUM QADAM.' During the discussion, Mr. Akram highlighted the pivotal role of China's private sector in driving economic growth. He emphasized that approximately 75% of business activity in China is generated by private enterprises, countering the common misconception perpetuated by Western media that the Chinese economy is fully state-controlled. Mr. Akram noted that the unique governance structure in China allows local governments to assess regional economic needs and provides guidance to private businesses, ensuring that sectors align with future economic demands. This supportive framework has allowed China's private sector to not only contribute significantly to GDP growth but also to assist new entrepreneurs in identifying profitable opportunities across varied industries.

China's Success in Artificial Intelligence Domain: Insights from

Mr. Khalid on FM 98 Dosti Channel

21 February 2025

On 21 February 2025, Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF), participated as a guest on FM 98 Dosti Channel's live radio program, "HUM QADAM." In his discussion, Mr. Akram emphasized key themes surrounding the recent Artificial Intelligence (AI) Action Summit held in Paris, where seven countries convened to discuss the future of AI technology.

During the interview, Mr. Akram underscored the importance of China's open-source AI models, highlighting that these models are pivotal in promoting inclusive AI development. He advocated for making AI technologies accessible to developing countries, asserting the need for equitable access to these innovations globally.

**Analysis by Mr. Khalid Taimur on “Pakistan's PM Visit to Uzbekistan” at Pakistan
Television (PTV World)**

26 February 2025

On 26 February 2025, Mr. Khalid Taimur Akram provided an exclusive analysis on the program "NEWSROOM" on PTV World. In the first half of the segment, Mr. Akram focused on Mr. Khalid Taimur Akram delved into the significant visit of Prime Minister of Pakistan H.E. Muhammad Shehbaz Sharif to the Republic of Uzbekistan from February 25 to 26. During this official visit, the Prime Minister engaged in a bilateral meeting with President of the Republic of Uzbekistan H.E. Shavkat Mirziyoyev, reinforcing the deep-rooted historic and fraternal ties between Pakistan and Uzbekistan. Mr. Akram also praised President Mirziyoyev's Central-South Asia concept and highlighted that both nations have set an ambitious goal to double their trade to \$2 billion. Critical discussions centered on infrastructure projects, such as the Trans-Afghan Railway. This railway project, which received its feasibility study in 2023, aims to enhance connectivity and facilitate trade not only between the two countries but also with surrounding Central Asian nations, thus working towards a more integrated regional economy.

China's Path to Progress: Exclusive Insights with Mr. Khalid Taimur on

FM 98 Dosti Channel

26 February 2025

On 26 February 2025, Mr. Khalid Taimur Akram, Executive Director of the Pakistan Research Center for a Community with Shared Future (PRCCSF), was invited as a guest on FM 98 Dosti Channel in Islamabad for a live interview on the program 'HUM QADAM.' During the discussion, Mr. Akram emphasized that China's new development philosophy has become a focal point of global interest. He discussed the Belt and Road Initiative (BRI), noting that its infrastructure projects are nearing completion and are instrumental in establishing a comprehensive global railway and maritime network. This initiative not only enhances connectivity for international trade but also reinforces China's role as a central trading partner, including with the United States.

Furthermore, Mr. Akram highlighted China's leadership in several technological sectors, including information technology, artificial intelligence, robotics, and space technology. He pointed out that advancements in lithium battery production and green energy initiatives are critical to China's economic strategy. These efforts are integral to boosting the supply chain mechanisms, which in turn bolster China's economy and enhance international trade.

Pakistani President Asif Ali Zardari's state visit to China earlier this month has proved to be productive by beefing up bilateral cooperation in sectors such as technology, energy, space science, agriculture and security, and highlighted Pakistan's commitment to the China-Pakistan Economic Corridor, experts said.

The five-day visit, from Feb 4 to 8, has strategic value, reaffirming the ironclad friendship between the two close neighbors, as well as their enduring strategic partnership, said Khalid Taimur Akram, executive director at the Pakistan Research Center for a Community with Shared Future in Islamabad.

"The strategic partnership and resilience of the Pakistan-China relationship remain vital for regional peace, economic growth, and mutual prosperity," he said. "This visit has set a positive trajectory for deeper cooperation, reinforcing Pakistan and China's shared vision for a community with a shared future."

Zardari's trip focused on accelerating the development of Pakistan's special economic zones, such as Rashakai, Dhabeji and Allama Iqbal Industrial City, to boost industrial growth and attract Chinese investments.

Both sides agreed to promote "high-quality development" under the CPEC 2.0, Akram said, adding that key agreements were reached this time to strengthen cooperation in the CPEC, science and technology, trade, and people's welfare.

President Kassym Tokayev's Remarks on Reshaping Trade Routes and Resources

Published on 8 February 2025

<https://prccsf.com/paper/pdf/President-Tokayev-Remarks-on-Reshaping-Trade-Routes.pdf>

On January 28, 2024, during an expanded government meeting, Kazakhstan President Kassym-Jomart Tokayev outlined his strategic vision for reshaping Kazakhstan's trade routes and resource management. His remarks focused on economic diversification, enhancing infrastructure, and boosting foreign investment in the country. Tokayev's emphasis on utilizing Kazakhstan's transit potential, developing the Trans-Caspian International Transport Route (TITR), and modernizing key infrastructure projects. He also underscored the urgent need for a comprehensive strategy to attract high-quality investments and enhance regional connectivity. Under his visionary leadership, Kazakhstan has strengthened its ties with neighbouring countries and major economies in Asia and Europe. Successful

implementation of the Middle Corridor will accelerate this trend, transforming Kazakhstan from a transit country a key influencer in global trade. This project will open new avenues for economic growth, create jobs, and attract foreign investment, making Kazakhstan a preferred destination for businesses seeking to access the vast Asian markets. President Kassym-Jomart Tokayev's remarks on reshaping trade routes and resources reveal a comprehensive strategy for positioning Kazakhstan as a critical hub in Eurasian trade. His focus on economic diversification, infrastructure modernization, and regional connectivity underscores his commitment to fostering sustainable growth and attracting high-quality investments. His leadership reflects a forward-thinking approach that will shape Kazakhstan's future for years to come.

China-Pakistan Economic Corridor

Published on 19 February 2025

<https://prccsf.com/paper/pdf/China-Pakistan-Economic-Corridor-RP.pdf>

Signed on April 20, 2015, during Chinese President Xi Jinping's visit to Pakistan, the China-Pakistan Economic Corridor (CPEC) is a large-scale two-sided initiative between Pakistan and China aimed to improve regional connectivity, promote economic growth, and enhance trade relations (Stevens, 2015). CPEC is an important project of China's Belt and Road Initiative (BRI), and it focuses on building a network of roads, railways, pipelines, and energy projects, linking China's Xinjiang region to Pakistan's Gwadar Port on the Arabian Sea. Beyond economics, it plays a vital role in geopolitical stability in South Asia. For China, CPEC serves as a crucial alternative trade route, which reduces its dependency on the Strait of Malacca for imports and exports (Choudhary, 2023). While for Pakistan, it positions the country as a critical hub for regional trade, boosting its geopolitical leverage. This partnership is also designed to bridge regional inequalities within Pakistan in underdeveloped regions such as Balochistan and Gilgit-Baltistan (Kumar & Stazel, 2016).

China-Latin America Trade booms with greater prospects

Published on 2 February 2025

<https://prccsf.com/paper/pdf/China-Latin-America-Trade-Booms.pdf>

China's trade with Latin America has experienced a significant boom in recent years, with prospects for continued growth this surge in trade is largely driven by China's hunger for natural resources, such as energy, metals, and food, to fuel its rapidly growing economy. This year marks a major milestone-the 20th anniversary of the first trade agreement between china and Latin American and Caribbean (LAC) countries. Over the past two decades, China has made significant strides in expanding its network of high standard free trade areas with LAC countries. Since 2005, China has signed and implemented five free trade agreements with Chile, Peru, Costa Rica, Ecuador, Nicaragua. Notably, the agreements with Nicaragua and Ecuador were concluded during China's 14th fiveyear plan period (2021-2025).

China has invested heavily in Latin America's energy sector, with a focus on oil and gas . China has also invested significantly in Latin America's mining sector, particularly in "lithium triangle" of Argentina, Bolivia, and Chile. Chinese companies are actively involved in large-scale infrastructure projects in Latin America, including transportation networks, ports, and telecommunication systems. While china's growing presence in Latin America presents opportunities for economic growth and development.

Concept of Humanism in China

Published on 6 February 2025

<https://prccsf.com/paper/pdf/Concept-of-Humanism-in-China.pdf>

Chinese Humanism, also known as "Ruxue" or "Confucian Humanism," is a rich philosophical and ethical system. It centers on the teachings of Confucius (551-479 BCE) and his followers, who aimed to build a harmonious society. This was achieved by cultivating virtues like ren (benevolence), yi (righteousness), and li (etiquette). At its heart, Chinese Humanism values each individual's inherent worth and dignity. It also emphasizes moral responsibility, encouraging people to act for the greater good. Self-cultivation is another key aspect, recognizing that personal growth is vital for creating a harmonious society. Chinese Humanism highlights the importance of social relationships, such as family and community, in shaping individual and collective well-being. This philosophical tradition takes a holistic approach, acknowledging the interconnectedness of individuals, society, and nature. It's also contextual, considering human behavior within specific social and cultural contexts. Ultimately, Chinese Humanism is a practical philosophy, focusing on real-world applications and solutions. From ancient thinkers like Confucius, Mencius, and Xunzi to modern scholars, Chinese humanism has evolved, adapting to the changing needs of society. Its core values of morality, self-cultivation, and social responsibility offer timeless wisdom, inspiring individuals and communities to strive for a more harmonious and just world. As we navigate the complexities of the modern era, Chinese humanism's insights and principles remain a valuable resource for promoting global understanding, cooperation, and peace.

China's Education System

Published on 6 February 2025

<https://prccsf.com/paper/pdf/Education-System-in-China.pdf>

China has one of the largest and most competitive education systems in the world. With an emphasis on academic excellence, discipline, and innovation, the country has made tremendous progress in education in recent decades. This article explores the structure of China's education system, its major achievements, and the challenges it faces. China has made significant progress in expanding its higher education system. Today, it is home to some of the world's top universities, including Tsinghua University and Peking University, which are ranked among the top institutions in the world. The number of university graduates has also increased dramatically, contributing to China's economic growth and innovation. China has prioritized education in science, technology, engineering, and mathematics (STEM). The country produces millions of STEM graduates each year, making it a global leader in technological advancements. Many Chinese universities collaborate with international institutions to improve research and innovation. With the rise of technology, China has integrated online learning and artificial intelligence (AI) into its education system. Platforms such as Tencent Classroom and XuetangX provide digital educational resources, making learning more accessible. AI-powered learning tools enable personalized instruction, allowing students to learn at their own pace.

E-commerce Revolution in China: Lessons for the World

Published on 6 February 2025

<https://prccsf.com/paper/pdf/E-commerce-Revolution-in-China.pdf>

China has become an e-commerce giant rapidly revolutionizing shopping, payments, and digital. Over the two decades, the nation has gone from a largely offline retail economy to a sophisticated digital marketplace powered by innovation, deep infrastructure, and a significant consumer footprint. Alibaba, JD.com, and Pinduoduo have become giants and ushered in this shopping experience revolution, with technological progress and the government's strategic support being the driving forces. The Chinese e-commerce revolution provides lessons for other countries who want to try to use digital technology to improve the retail ecosystems in their country. One of the reasons for the incredible growth of e-commerce in China is its huge digitally savvy consumer population. Nearly everybody has a smartphone and Internet connection, so more people rely on the Internet as a daily shopping strategy. Along with this, China's culture of quickly adopting new technologies has helped build a ground for emerging innovative e-commerce solutions to become a way of life. The sector has benefited from greater social commerce, mobile payments and logistics advancements.

China experienced an early start in advancing its e-commerce infrastructure, and as the global market advances in the coming years and decades, elements of China's approaches will undoubtedly be utilized as a reference for further improvements.

The Rise of Robots in China

Published on 8 February 2025

<https://prccsf.com/paper/pdf/The-Rise-of-Robots-in-China.pdf>

The largest usage of industrial robots worldwide is China. China accounted for over 30 percent of the worldwide market in 2016 with 87,000 industrial robots sold. To put this figure in perspective, the International Federation of Robotics reports that in 2016, 97,300 robots were sold throughout Europe and the Americas. China's operating stock of industrial robots grew at an average annual pace of 38% between 2005 and 2016. China is rapidly incorporating automation and artificial intelligence (AI) into many areas of its business as part of a robotics revolution. China is using robotics to boost productivity, lower labor costs, and preserve its position as the world's largest industrial hub and a pioneer in technical innovation. The country has grown rapidly in robotics, from industrial automation to AI-powered service robots, thanks to corporate investments, government regulations, and a move toward technological self-sufficiency. The main drivers of China's robot boom, their effects on various industries, and the difficulties the nation faces as it maintains its position as a leader in this revolutionary field are all examined in this article. China's rapid rise in robotics is reshaping industries and setting the stage for a more automated future. With strong government support, strategic investments, and cutting-edge AI integration, China is on track to become the world's leading robotics powerhouse. From smart factories and AI-driven healthcare robots to autonomous vehicles and smart cities, China is leveraging robotics to boost productivity and enhance its global competitiveness.

The Electric Vehicles Boom in China: From Policy to Global Market Dominance

Published on 8 February 2025

<https://prccsf.com/paper/pdf/The-Electric-Vehicles-Boom-in-China.pdf>

In the early 2000s, before fully venturing into the field of electric vehicles (EVs), China's automotive industry was in an unusual position. It was a powerhouse in assembling conventional gasolinepowered vehicles, yet it lacked domestic brands capable of competing with the foreign manufacturers that dominated the market. "They understood... that they could never surpass the U.S., German, and Japanese legacy automakers in internal combustion engine innovation," says Tu Le, managing director of Sino Auto Insights, a business consulting firm specializing in transportation. Additionally, research on hybrid vehicles—where the battery initially played a secondary role to the gasoline engine—was already being led by countries like Japan, making it difficult for China to compete in that sector. This realization pushed the Chinese government to break away from established technologies and invest in an entirely new area: battery-powered vehicles. As a result, China became a global leader in both the production and adoption of EVs. The momentum has only grown stronger—between 2020 and 2022, annual EV sales in China skyrocketed from 1.3 million to an astounding 6.8 million. This made 2022 the eighth consecutive year in which China was the world's largest EV market. For comparison, the U.S. sold only about 800,000 EVs in 2022. The industry's rapid growth has even surprised experts.

Community with a Shared Future for Mankind as a Humanistic and Symbiotic democratization in International Relations

Published on 10 February 2025

<https://prccsf.com/paper/pdf/Community-with-Shared-Future-for-Mankind.pdf>

The 21st-century international system is undergoing a fundamental change. The historic Western, especially American and European, dominance is being challenged by rising powers in the Global South, notably China. This change is more than a political and economic realignment; it is the emergence of a new international order where values and visions from erstwhile excluded regions are coming to the forefront. The concept of a "hybrid and fragmented global war" (Merino, 2021) that the world is going through in transition, where not only conventional military power but also communication, economic, and energy tactics to influence global relations. Further more the West and the East, as seen in the Ukraine and Israel conflicts, highlights the intensifying polarization of global powers. academics like Boaventura de Sousa Santos and Gladys Lechini highlight the Global South as a voice that is essential but usually marginalized in global conversation.

China's Growing Role in Global Finance

Published on 10 February 2025

<https://prccsf.com/paper/pdf/China-growing-role-in-global-finance.pdf>

One of the main features of the 21st century is the expanding influence of China in global finance, creating a whole new set of economic dynamics and challenging the traditional supremacy of Western financial institutions. China has made the remarkable leap into a key player in the world financial system; this emergence has occurred at breathtaking speed with respect to economic growth and has been complemented significantly with strategic policy options and overseas investments. Through several channels, we can examine this transformation: renminbi (RMB) internationalization, China's role in multilateral financial institutions, the Belt and Road Initiative (BRI), and increased activity in global debt markets. Conversely, another cornerstone of China's economic prominence is internationalization of the renminbi. However, although the U.S. dollar is, for now, the currency of choice the world over, China seeks to present the RMB as a strong competitor in the field of international trade and investment. The inclusion of the RMB in the IMF Special Drawing Rights basket (SDR) in 2016 was a symbolically significant milestone, on one hand representing the increased global acceptance of the currency. On the other hand, China has been signing currency swap agreements with a host of countries to settle trade in RMB and limit reliance on the U.S. dollar.

Shenzhen Role in Tech Development

Published on 11 February 2025

<https://prccsf.com/paper/pdf/Shenzhen-Role-in-Tech-Development.pdf>

Shenzhen is often regarded as one of the most significant innovation hubs in the world, especially in the context of technology and manufacturing. Over the years, the city has played a pivotal role in shaping China's technological landscape and has become a global leader in industries like electronics, hardware manufacturing, artificial intelligence (AI), and telecommunications. Let's dive deeper into Shenzhen's role and look at other notable innovation hubs across the globe and their contributions to tech development. Shenzhen stands as the premier global center for the design and production of electronics and hardware. The city boasts a multitude of factories, design firms, and component suppliers, enabling tech startups to rapidly and affordably develop prototypes and manufacture products. Referred to as "The Silicon Valley of Hardware," Shenzhen is frequently likened to Silicon Valley but focuses on hardware instead of software. Renowned international firms like Huawei, DJI, and Tencent originated in Shenzhen, taking advantage of the city's vast manufacturing resources and advanced technology ecosystem. Shenzhen is the headquarters of Huawei, a leading company in 5G technology worldwide. The city has evolved into a global testing ground for 5G applications, fostering advancements in telecommunications infrastructure and mobile technology. Through considerable investments in 5G technology and research and development, Shenzhen has established itself as a hub for the upcoming era of wireless communication, advancing the global 5G rollout.

China – Malaysia Regional Connectivity: A Game Changer for Region

Published on 11 February 2025

<https://prccsf.com/paper/pdf/China-Malaysia-Relationship.pdf>

China and Malaysia share a long history of economic, cultural, and diplomatic relationship, which have been rooting back over the years through multiple regional connectivity projects. The relationship has grown stronger under China's Belt and Road Initiative (BRI), which was aimed to create a network of trade routes with different states. Malaysia has played a important role because of its strategic location along important maritime routes. Malaysia is strategically located at the heart of Southeast Asia and serves as a gateway to ASEAN's 650 million people and a combined GDP of US\$3.2 trillion. Its geographical advantage positions it as a hub for accessing ASEAN markets and connecting to the Middle East, Australia, and New Zealand. One of the main base of connectivity between China and Malaysia is infrastructure development. Projects such as the East Coast Rail Link (ECRL) in Malaysia, aim to improve transportation within Malaysia and enhance its links with regional trade networks. The ECRL, which will connect the east and west coasts of Peninsular Malaysia, which is set to reduce travel time, lower transportation costs, and increase economic activities backward areas. This railway project also strengthens Malaysia's position as a regional center for trade and developing smooth movement of goods between China and Southeast Asia. The strong foundation of mutual interests and historical relationship provides a solid ground for continued growth. As both countries cross the evolving landscape of regional and global affairs, their connectivity will play an important role in shaping the future of Southeast Asia and beyond.

The China-Uzbekistan Trade Corridor: Unlocking Economic Potential

Published on 12 February 2025

<https://prccsf.com/paper/pdf/The-China-Uzbekistan-Trade-Corridor.pdf>

The China-Uzbekistan Trade Corridor is a vital artery of trade and commerce that connects the world's second-largest economy, China, with the strategic Central Asian nation of Uzbekistan. Stretching over 3,500 kilometers, this corridor is a critical component of regional trade and economic development, facilitating the exchange of goods, services, and ideas between China, Uzbekistan, and other neighboring countries. As a key component of China's Belt and Road Initiative (BRI), the China-Uzbekistan Trade Corridor has the potential to unlock economic growth and development in the region, transforming the lives of millions of people and reshaping the economic landscape of Central Asia. The corridor's significance extends beyond its economic benefits, as it also holds the potential to foster greater regional cooperation, improve connectivity, and enhance energy security. By reducing transportation costs, increasing trade volumes, and promoting economic integration, the China-Uzbekistan Trade Corridor can help to stimulate economic growth, reduce poverty, and improve living standards in the region. The corridor's development also have a positive impact on regional stability and security, by promoting greater cooperation and understanding among nations. Ultimately, the China-Uzbekistan Trade Corridor represents a pivotal moment in the region's economic history, one that can shape the course of development for generations to come. As such, it is essential that all stakeholders, including governments, businesses, and civil society, work together to ensure the corridor's successful implementation and maximize its benefits for the people of Uzbekistan and the wider region.

China's Soft Power Strategy: How Culture, Media, and Technology Shape Global Perceptions

Published on 12 February 2025

<https://prccsf.com/paper/pdf/Chinas-Soft-Power-Strategy.pdf>

Soft power, a term begat by political researcher Joseph Nye, alludes to a country's capacity to impact others through fascination instead of pressure. Dissimilar to hard power, which depends on military and financial power, soft power is tied in with molding worldwide discernments through culture, media, and discretion. China has effectively sought after a soft power methodology to upgrade its worldwide impact, situating itself as a social, innovative, and political pioneer. China's way to deal with soft power is complex, enveloping state-controlled media, the extension of Confucius Foundations, worldwide amusement adventures, and advanced tact. This article investigates how China use these instruments to shape worldwide stories, advance its qualities, and counter Western impact. China has additionally utilized emblematic discretion, like panda tact, to fortify reciprocal relations. By giving or advancing goliath pandas to unfamiliar zoos, China makes social altruism and positive affiliations. Likewise, social celebrations, scholastic trades, and the travel industry advancements improve China's soft power reach. China's soft power strategy is a diverse exertion that joins culture, media, innovation, and strategy to reshape worldwide discernments. While its drives have effectively extended China's impact in numerous locales, challenges stay in defeating suspicion and political obstruction. As China keeps on ascending as a worldwide power, its capacity to refine and adjust its soft power approach will decide how successfully it can keep up with its impact in an undeniably perplexing international scene.

China's Renewable Energy Revolution: Solar and Wind Power

Published on 12 February 2025

<https://prccsf.com/paper/pdf/China-Renewable-Energy-Revolution.pdf>

Renewable energy represents China's most transformative development in global energy management. The country stands as the world's most substantial energy consumer and carbon-producing entity yet recognizes the critical requirement for a fossil fuel switch to renewable alternatives. China has gained leadership position in solar and wind power manufacturing and application to advocate for both carbon emission reduction and environmentally sustainable progress. The Chinese government allocated billions of dollars to renewable energy investments which made China lead other nations in both capacity development and renewable innovation. Chinese authorities made two nationwide clean energy targets including early emission peak achievement by 2030 alongside carbon neutral status delivery by 2060. Fastpaced innovations in solar and wind power technology resulted from these targets which enabled large-scale implementation and sustained transformation of the international energy sector. Solar energy production in China stands as the global leader. PV solar panel production in China exceeds all other countries as it controls more than 70% of worldwide manufacturing operations.

Chinese Women's Empowerment

Published on 14 February 2025

<https://prccsf.com/paper/pdf/Chinese-Womens-Empowerment.pdf>

China, a country with rich history and culture heritage, has undergone significant transformations in recent decades. One of the most notable changes has been the evolving role of women in Chinese society. This article will explore the historical context, current challenges and future opportunities women in China, highlighting the progress made and the work still to be done. In traditional Chinese society, women were expected to fulfill domestic roles, with limited access to education, employment, and social participation. The communist revolution in 1949 brought significant changes, with the new government promoting socialist ideals of equality and women's liberation. Women were encouraged to participate in the workforce, and education and healthcare opportunities. Progress and Opportunities: China has made significant strides in promoting Gender equality, offering a wealth of opportunities for women to thrive. Women now comprise over 40 percent of China's workforce, marking a substantial increase in their participation. This shift has not only contributed to economic growth but also paved the way for women to take on leadership roles and start their own business. Many successful female entrepreneurs and leaders have emerged in China, inspiring a new generation of women to pursue their passions. With growing support for women-led businesses, China is fostering a culture of innovation and equality.

China's Investment in Pakistan: Opportunities and Challenges

Published on 17 February 2025

<https://prccsf.com/paper/pdf/China-Investment-in-Pakistan.pdf>

China's investment in Pakistan is considered the beacon lighting this transformative and unparalleled path for growth and development opportunity. In several periods over the years, China became longest and has been most trusted economic partner Pakistan ever had. The benefits of investments have affected the infrastructure, the industrial sector, and in fact the whole energy landscape of the country. This is the kind of strategic partnership to bring about economic stability with regional connectivity and would benefit millions of people. This multibillion investment illustrates a major axle at the heart of the China-Pakistan Economic Corridor. Certainly, it focuses on transforming the people's infrastructure on Pakistani territory. Road, highways, and rail networks have been constructed and funded under CPEC, revolutionizing access to trade by drastically reducing transportation costs. At present, Gwadar Port is being firmly supported as the linchpin of this project. It is likely to be the global trading hub-contractor of China to other markets, especially in the Middle East and Africa. The development is crucial for Pakistan's entry into the global trade network and provides long-term benefits

Marvelous Beauty of Bukhara

UZBEKISTAN OPINION/STORIES

by Muhammad Ali Pasha February 12, 2025

A thick historical atmosphere enveloped me when I entered the ancient Bukhara streets. The city's atmosphere appeared stagnant as time seemed to stop while minarets rose like quiet guardian towers of a past age and the melodious voices of prayers sang throughout the environment until they found their home under the turquoise domes.

During my arrival on October 20th 2023 the Government of Uzbekistan had brought me to this city though its magnificence exceeded my written descriptions. My arrival brought me into a centuries-old warm embrace as local people greeted me with welcoming smiles while spices created an enchanting aroma that surrounded me. Every architectural element combined with the soft winds suffused the air with stories which I wanted to hear.

The Heart of an Empire

Bukhara continues to serve as a cultural and scholarly and commercial landmark that has existed for more than two thousand years. The city acted as a vital trading spot along the Silk Road where merchants and scholars and poets found common ground to merge different civilizations. The Samanid Dynasty sustained the city during the ninth and tenth centuries as it grew into an intellectual center between the ninth and tenth centuries. Following the tribulations of the Mongol invasion in 13th-century Bukhara the Timurids restored it before bringing lavish enhancements to its streets.

While exploring its complex alleyways I pictured the intellectual giants who previously walked along these exact passageways. The eminent scholar Imam al-Bukhari used this place to compile his masterpiece collection of hadith. An eerie sensation ran through me when this realization struck because Samarkand functioned as both a sacred knowledge hub and an intellectual sanctuary.

China and Singapore Stepping Up Cooperation Under the Framework of Belt and Road Initiative

BUSINESS CHINA OPINION/STORIES

Tanzeela Khan February 17, 2025

China's BRI was launched as a vast development and investment program aiming to create a unified market across continents. The BRI is a win-win initiative, linking up countries around the region in terms of finance, infrastructure projects, and people-to-people connectivity. In the last decade, the BRI expanded to Latin America, Europe, Africa, and Asia with more than 150 participating countries, including Singapore. When China started this initiative, Singapore identified the positive opportunities in the BRI project for both countries, which include reducing trade barriers, strengthening trade links, the emergence of new markets and opportunities, and collaborating in green financing and green technology.

There are constructive bilateral relations between China and Singapore, and they both leverage each other's strength. Both countries are looking forward to a multilateral trading system to promote the construction of free trade zones and facilitate the liberalization of trade and investment, as trade is the most important engine of economic growth. Singapore is in the position to play a crucial role in the Belt and Road Initiative. It has the potential to be an all-round cooperative partner with China. Moreover, it will provide space for Singapore's own development and also contribute to regional growth and stability.
