"A friend in need is a friend indeed"

The historic evolution of the Pakistan-China relationship can be witnessed in the context of changing regional and global developments. Now, 71 years of exceptional friendship have grown manifold as both states have supported each other on every international platform. The non-regional powers tried to create many ups and down in diplomatic and economic partnerships. However, they have remained failed to rupture the strong bond between both nations. The true model of Pak-China friendship is underpinned by the rationale of mutual trust, common interests, equality, and a convergent outlook. While adhering to these fundamental principles, it is a proud time to see the China-Pakistan relationship as a model of peaceful coexistence.

The mutual attachment of true friendship date back to centuries-old trade relations, when Chinese traders travel through the sub-continent
